

## **Asia COVID-19 & Vaccine Tracker**

## Free to View Economics - Asia

## More vaccines on the way

- Parts of ASEAN are allowing a further re-opening of some nonessential sectors while Singapore is seeing rising cases
- Emerging Asia may see more vaccine shipments given likely increasing vaccine supplies and donations from partners
- Southeast Asia is looking to unlock tourism pilot programs, but low vaccination rates are hindering their timelines

#### A long-term strategy

Parts of ASEAN are seeing more easing of restrictions. Indonesia has further eased some mobility curbs, now allowing fully vaccinated workers in non-essential sectors to work in offices at 25% capacity. The country saw the lowest number of daily infections in almost a year. Meanwhile, Singapore has seen new cases jumping to the highest level since last April. While infections are rising rapidly, the authorities have refrained from tightening measures, as they are set to look through daily cases, but cautiously monitor serious cases and hospital capacity. This is part of Singapore's long-term strategy to "co-live with the virus" after becoming the first Asian country to achieve an impressive full vaccination rate of 80%. But Singapore's Health Minister Ong Ye Kung also expressed his caution that, if the Delta wave worsens, more restrictions as a "last resort" may have to be imposed (*Strait Times*, 22 September).

## Hope for more vaccines

While some emerging markets are still facing vaccine shortages, there may be a silver lining for them: shipments may begin to pick up. For one, India has recently announced it would resume vaccine exports in 4Q after suspending them in April, helping to fulfil its responsibility towards COVAX (*Nikkei*, 22 September). Meanwhile, the US and Japan plan to donate an additional 500m and 30m doses of vaccines, increasing their total contributions to 1.1bn and 60m, respectively. Earlier, China has also made a commitment to donate 100m doses to developing countries by end-2021, on top of its previous announcement that it would provide 2bn jabs of vaccines to the world this year (*Reuters*, 6 August and 9 September). That said, the possible increase in the use of boosters in economies that have already reached high vaccination rates raises the risks of less readily available supply elsewhere.

#### Eyes on tourism

After Thailand's Phuket sandbox scheme that has attracted more than 26k tourists in two months since its launch on 1 July, many ASEAN countries are looking to introduce their own pilot programs to revive their international tourism. Vietnam and Indonesia plan to re-open their popular tourist destinations Phu Quoc and Bali islands in October, respectively. Indonesia's tourism minister also suggested to establish a regional travel bubble among Phuket, Langkawi and Bali (*South China Morning Post*, 15 September). That said, an acceleration of vaccine roll-out is needed to ensure a sustained tourism re-opening, as many ASEAN countries (except Singapore and Malaysia), have low *full* vaccination rates. Even in Thailand, re-opening of other tourist destinations, including Bangkok, may be postponed from October to November, given their slow vaccination progress (*Bangkok Post*, 22 September).

This is an abridged version of a report by the same title published on 24-Sep-21. Please contact your HSBC representative or email <u>AskResearch@hsbc.com</u> for more information.

#### Asia COVID-19 and Vaccine Tracker

#### Chart 1: Total confirmed vaccine doses by country and territory (% of population)

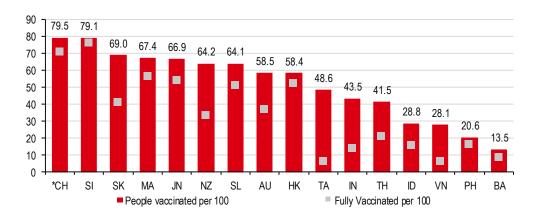

Most economies have secured enough vaccine doses to vaccinate at least 50% of their population

Note: \*CH – mainland China. Duke University's data do not include domestic supply for mainland China (not made publicly available). Source: Duke University Health Innovation Center, HSBC

Chart 2: Percentage of people who received at least one dose and were fully vaccinated

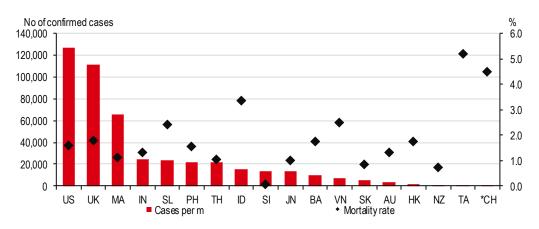

Mainland China and Singapore lead Asia in terms of vaccination progress

Note: \*CH – mainland China data is our estimates from total number of doses given. As of 18 September, 70.8% of the population is fully vaccinated. Source: Our World in Data, HSBC

Chart 3: Cumulative confirmed COVID-19 cases per one million population

Number of confirmed COVID-19 cases (per one million people) in Asia remains far below those in Western economies

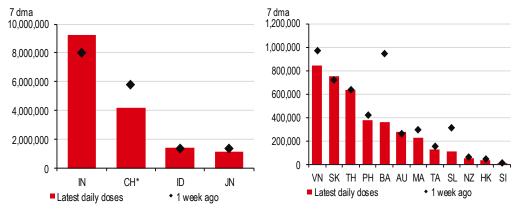

Note: \*CH - mainland China is our estimated share of people vaccinated from total number of doses given. As of 6 September, 67% of its population has been fully vaccinated. Source: CEIC. HSBC

## **Asia COVID-19 and Vaccine Tracker**

#### Chart 4: Daily vaccination rate per economy (7-day moving average)

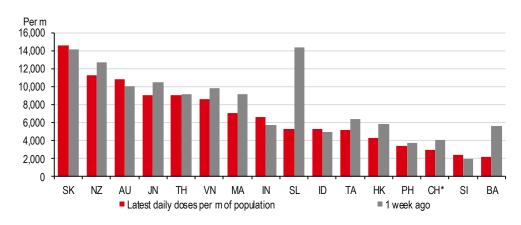

Vaccination rates in India and mainland China continue to lead Asia

Source: Our World in Data, HSBC. Note: \*CH - mainland China.

Chart 5: Daily vaccine rate per million of population

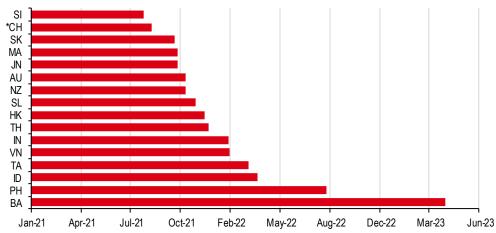

South Korea and New Zealand continue their steady vaccine progress in terms of daily doses per million population

Source: Our World in Data, HSBC. Note: \*CH – mainland China.

Chart 6: Projected timeline, given the pace of daily vaccination, of reaching 70% population vaccination rates

At current daily vaccination rate, when might 70% of the population be fully vaccinated?
