

HSBC Global Research expansion of US equity coverage

- ◆ US equity coverage has risen to over 270 stocks names, amounting to c.USD28.4trillion of market cap
- ◆ From financial and technology through to consumer, healthcare and automation, the coverage is fully integrated into our global sector thematic coverage
- ◆ The US equities team has continued to expand with 8 new sector analysts joining, bringing the total headcount to 18

Expanding our coverage has helped WPB colleagues respond to increasing requests from clients for insight on US equity markets. This also reinforces the value of Global Research's intellectual capital to the HSBC Group as a whole, and to a broad set of clients including institutional investors, and corporates.

Our global clients require a strong presence in the US, evidenced by the fact that we are already a top five USD clearer. We want to be the go to house for connecting emerging and developed markets.

Nine Themes Talking Points - Expanding our coverage of key US sectors

David May, HSBC's Global Head of Research, explores some of the links between our nine investment themes and our expanded coverage of key US sectors.
