Independent, insightful, investable

We help you make investment decisions in a world where risks and opportunities can shift from day to day

It's hard to keep up in a world that feels like it's changing faster than ever. Yet investors, companies, and policymakers cannot slow down, and must keep making decisions. Global Investment Research has the expertise to help institutional and corporate clients – as well as our colleagues at HSBC – make the right investment calls.

As HSBC's independent research business, our global team is organised around three pillars:

- ◆ **Global Economics:** We cover key countries and regions, and have a dedicated focus on trade
- ◆ **Macro Strategy:** Integrated coverage across Multi-Asset, FX, Fixed Income, EM and Equity Strategy
- ◆ **Equity Research:** Focus on Asia, Middle East, and Emerging Markets overall, as well as key US and global industry sectors

These pillars are supported by our integrated approach across **AI and Data Science**, **Digital Assets** and **Sustainability**. Collaboration across asset classes is key for us.

Our research has won many awards. This reflects the breadth of what we offer: short- and long-term economic, currency, bond, and commodity forecasts across the

globe, multi-asset positioning, equity strategy views, scenario analysis on hundreds of stocks and sectors, and deep dives into the Nine Themes that are shaping the investment world, from automation to demographics, to energy transition and disruptive technology.

Global Investment Research has views you can use. While we harness cutting-edge data science techniques, including the power of AI, we see judgement as the essence of financial research.

The collective experience and acumen of our team of professionals are at the heart of our offering to you. Let our unique and thought-provoking analysis and insights help you make the right call.

We look forward to working with you.

Sincerely, David May
