

HSBC UK MidCap Equity Research

How our approach and offering are different

- ◆ **Assumptions and share prices:** What is 'in the price', how and when that may change, and the valuation implications of such changes
- ◆ **Team approach:** We debate, test and develop ideas together, using our combined 104 years of experience in the industry. As a team we have covered 18 sectors.
- ◆ **Focus:** We each cover a limited number of stocks, work closely with our forensic accountant, and aim to more holistically understand the accounts, commercial propositions, markets and supply chains of the companies we cover
- ◆ **Multiple sources:** We spend more time discussing issues with supply chain participants, industry bodies, and statistical agencies as well as looking for granular data and opinions that may provoke questions and suggest alternative drivers of company performance
