Introducing Global Research

Investment conditions remain tough, with global markets facing continued challenges from geopolitical and other risks...

We have the expertise to help institutional and corporate clients – as well as our colleagues at HSBC – navigate these uncertain times. **Our award-winning analysts produce more than 12,000 reports each year with topical, timely and relevant insight** on everything from currency movements to commodities, bond yields, global stock markets, macroeconomics, and technology trends.

Our international footprint spans the geographies that matter most to our clients, and our on-the-ground presence in major emerging markets complements our deep expertise in the developed markets. **Our experience in China differentiates us from other research houses**, as shown by our coverage of the A-share market through HSBC Qianhai Securities, our majority-owned China onshore joint venture. **On the other side of the globe, we have recently expanded our US equity coverage of close to 300 stocks, amounting to c.\$35 trillion of market cap.**

Collaboration across asset classes is key to our approach, with a dedicated team offering a global, multi-asset perspective. And we continue to focus on the distinctive strengths that clients value.

We have **sharpened our focus on thematic research**, taking deep dives into trends that are likely to reshape markets for years to come – including demographics, disruptive technologies, and the transition to a net-zero future. Data science is increasingly integrated across our platform, as we deploy **machine learning technology to inform everything from equity strategy to FX**. And our **Sustainability Research team** is supporting colleagues to integrate sustainability issues at the heart of financial models and investment opinions.

As we bring our expertise to new audiences, we offer a variety of ways to access our work. These include a **Global Research app** showcasing key reports, and – to give prospective clients a sense of our output – public access to a curated selection of podcasts and live events. Read on to find out how you can subscribe.

We look forward to hearing from you.

Sincerely, David May

David May

IN FOCUS | Q4 2024

HSBC expansion of US equity coverage

Our US equity coverage has recently more than doubled to c.USD35trn of market cap, encompassing multiple sectors from financial and technology through to consumer, healthcare and automation. These stocks are fully integrated into our global sector and thematic coverage

What sets us apart? At HSBC Global Research, we:

- ◆ Take an integrated approach, working across asset classes and regions to put our research into context so that clients get the bigger picture.
- ◆ View equity and macro topics through a global lens – Global Research has more than **330 analysts in 17 locations** – while our strong focus on emerging markets helps clients bridge the gap between emerging and developed markets. The team produces research on the economies of **North, Central and South America, as well as equities and sustainability across the region.**
- ◆ Draw on the expertise of our economists across the Americas and equity strategists, as well as **multi-asset and data scientists** based around the world.
